PERSONAL STATEMENT

Computer Science graduate (BSc, 2:1) with experience in Python, SQL and data visualisation. Skilled in cleaning and analysing datasets, performing exploratory analysis, and presenting insights through dashboards and reports. Recently completed a Data Analyst bootcamp focused on Python, Excel and Power BI. Seeking an entry-level data role where I can apply analytical and technical knowledge to support real data-driven business decisions.

KEY SKILLS

Programming & Data Analysis

- Python (Pandas, NumPy, SciPy, NLTK): data cleaning, transformation and statistical analysis
- SQL: querying and extracting structured datasets

Analysis & Insight

- Exploratory data analysis, trend identification, pattern recognition
- Applying data to support evidence-based decision-making for real-world application

Visualisation & Reporting

- Power BI & Tableau: dashboard development and data storytelling
- Microsoft Excel: pivot tables, data cleaning and analysis

Tools

- Git / GitHub: version control and structured workflows

Communication

- Presenting complex data insights clearly to non-technical audiences
- Working effectively within teams and contributing to a shared goal

Languages

- English, Cantonese Chinese

EXPERIENCE

Generation Data Analyst Bootcamp Training, Generation UK&I, Apr 2026 - June 2026

Completed intensive training in data analytics including data cleaning, analysis, visualisation and business insight generation.

- Analysed and cleaned datasets using Python, SQL and Microsoft Excel to identify trends, inconsistencies and actionable insights
- Created dashboards and visual reports in Excel and Power BI to communicate findings clearly to technical and non-technical audiences
- Applied statistics and exploratory data analysis to solve real-world business problems.
- Built teamwork, presentation and communication skills through collaborative exercises
- Produced a data analysis presentation for an e-commerce company as final project, using visualisations to support business expansion recommendations.

Volunteer, Oxfam, Jan 2019 - Jun 2019

Supported the operations of a customer-focused charity shop, developing organisation, communication and teamwork skills in a retail environment.

- Maintained transaction records and supported daily reporting
- Priced and organised donated products efficiently, demonstrating strong organisation and time management skills through stock take and management
- Assisted the donation process, answering customers' questions and worked collaboratively with volunteers to maintain a positive in-store experience

Code Club Leader, Oct 2019 - Dec 2019

Led a weekly coding class for children at a local library, developing leadership, communication and mentoring skills through lesson planning and delivery.

- Delivered coding sessions to a group of 6 children, adapting lesson content to different ability levels

WORK EXPERIENCE

Customer Service Associate, Cinnabon (Euro Garages), Dec 2022 - Jun 2023

Supported efficient day-to-day store operations in a fast-paced customer environment, maintaining service quality during high-demand periods. Contributed to the team with strong organisation, communication and attention to detail.

- Demonstrated high attention to detail by processing daily financial transactions exceeding £1,000 with accuracy, ensuring financial integrity
- Applied analytical thinking to assess sales patterns and recommend staffing adjustments, improving efficiency
- Maintained strong multitasking skills while managing online and in-person orders, ensuring consistent service quality
- Showcased reliability and time management by working 4–5 shifts weekly, including opening and closing operations

EDUCATION

BSc with Hons in Computer Science (2:1), University of Nottingham, Sep 2020 - Jul 2024

- Best Demonstration Prize for a motion-based music program project, demonstrating technical skills and client communication.
- Developed an NLTK-based chatbot focusing on natural language processing and dialogue design
- Showcased problem-solving and machine learning skills by building a Python-based Wordle agent
- Used analytical and user-focused thinking to conduct UX evaluations and prototype testing for a mobile app
- Developed collaboration and cross-cultural communication skills through international team projects

Woodford High School for Girls, Sep 2013 – Jun 2020

- A Levels: Psychology (A), Mathematics (B), Computer Science (B)
- GCSEs: Mathematics (9), English Literature (9), English Language (8), Chinese (A*). 1 A*, 5 grade 9s, 3 grade 8s, 1 grade 7 overall

CERTIFICATIONS

- **Google Data Analytics Certificate, Coursera (2025)**

INTERESTS

I enjoy applying data analysis to datasets relating to real world problems. My personal projects have included analysing and creating visualisations for a [Superstore dataset](#) in Excel, [UK household energy trends](#) in Tableau and [Japan's COVID-19 healthcare data](#) in Power BI. Outside of my technical interests, I also enjoy language learning, and manage online art commissions, which has strengthened my communication, organisation and client management skills while working to deadlines.
